## Tiffany Vinyl Gazebos Are Unique

Unlike wood gazebos, Tiffany vinyl gazebos are unique in the industry. The drudgery and expense of repair, wood replacement, scraping, sanding, caulking and painting are all things of the past. Tiffany vinyl gazebos are engineered to withstand the extremes of wind, sun and snow without adverse affects. An occasional rinse with the garden hose will keep them looking good, year after year.

Tiffany Gazebos are designed with components that easily connect together, eliminating the need for unsightly bolts and fasteners. Tiffany Gazebo kit comes with fully illustrated instructions and are pre-cut ready to assemble. All you need to install your Tiffany Gazebo are simple hand tools. Even the occasional handyman will get professional results. Structural elements are lightweight and easy to handle, allowing just two people to erect our largest units. Most of our gazebos can be installed in under a day, making them an ideal weekend project.
